

Ultrafast Unloading of DB2 tables

DB2 InfoUnload® for z/OS

Together with InfoLoad and InfoReorg, **InfoUnload** is part of the INFO-UTIL line, a software suite ensuring operational performance and data availability.

? The Problem

- ◆ More and more critical applications require 24/7 availability of the company's data
- ◆ It is necessary to unload, reload, transfer and integrate increasing volumes of data, resulting in higher and higher
- ◆ The development of very different applications (ERP, CRM, etc.) requires converting data between heterogeneous environments
- ◆ A significant reduction in unload times is becoming a major necessity.

! The InfoUnload solution

- ◆ **InfoUnload** is an ultrafast DB2 table unloading utility
- ◆ **InfoUnload** reduces unload times by up to factor of 10 compared with standard products, and offers your company a set of additional features enhancing operational flexibility
- ◆ **InfoUnload** is compatible with all the major utility vendor (syntax and JCL) and preserves your existing job streams.

The advantages of InfoUnload: Performance, speed, and flexibility

- ◆ The fastest unload tool on the market
- ◆ Increased data availability
- ◆ Lower unload costs by decreasing CPU time and the number of I/Os
- ◆ Unloading possible from a Full Image Copy (FIC)
- ◆ Selective unloading of the required data and decrease in the number of sorts
- ◆ Large number of conversion routines to provide data for non-DB2 environments
- ◆ Several unloading operations in parallel in a single read.

We are prepared to demonstrate to you the excellent return on investment you will achieve with InfoUnload.

**Our software products are distributed world-wide.
Our technical support is there to serve you 24/7.**

Exceptionally Fast Unloading

The special access method of **InfoUnload** (native VSAM) allows up to a tenfold decrease in DB2 unload CPU and elapsed times.

A Simple Process Flow

- 1 The input data is either DB2 tables or their Full Image Copies.
- 2 Unload files can be generated without conversion.
- 3 The sequential unload files are generated in user format.
- 4 The Load command files are generated.
- 5 An execution report is output.

Very Easy to Use

- A user-friendly ISPF interface to:
- Select the DB2 objects to be unloaded
 - Generate and store the suitable JCL.

Additional Features

- ◆ **InfoUnload** allows unloading from:
 - A Full Image Copy
 - One or more partitions in parallel.
- ◆ **InfoUnload** allows data to be unloaded in sequential or VSAM files
- ◆ **InfoUnload** allows DB2 data to be unloaded into several files in a single operation
- ◆ During unload, **InfoUnload** allows read-only or read/write access
- ◆ **InfoUnload** unloads only the selected rows and columns based on many selection criteria
- ◆ During unload, **InfoUnload** can convert the data from one type to another
- ◆ **InfoUnload** can export the data in the format selected by the user, even non-DB2
- ◆ **InfoUnload** provides all sort functions on the unloaded data
- ◆ **InfoUnload** is compatible with the syntax of all the tools on the market.
